Super quick.

We know it's all about speed—enough to stay ahead of your and speed to market are core values. Not only is our product lightning fast, our platform is entirely ACORD XML-based, bringing value right out of the gate with pre-built web applications we call ACORD Templates—getting you live quickly and easily.

Super flexible.

AgencyPortal™ is designed to fit into your environment, no matter what it is or how it changes. Implementing a new Policy System? Keeping it forever? Migrating from one to the other—or several? It doesn't matter. Our goal is to extend your current assets, not replace them—and always be behind the engines. And if you're ready to move to a new system, your agents and distribution partners won't notice.

Power beyond the point of sale.

In the specialty or reinsurance markets? We offer the leading solutions in both distribution and core processing of policy and claims administration, billing and accounting. Together, AgencyPortal™ and Open+, offer a unique benefit: a single underlying definition set for both product and underwriting rules.

Be a hero to your agents, too.

AgencyPortal™ combined with our agent interface solution, AgencyConnect™, or our PDF parser, Turnstile, gives agents and other distribution partners the easiest, most intuitive user experience around. Whatever the transaction—policy inquiry, real-time bridging, real-time rating, endorsements—AgencyConnect™ is your gateway to interfacing simply, cleanly and seamlessly with agency systems. Turnstile converts forms received by e-mail into XML so that you don't re-key data on behalf of your agents.
